The 'Borderlands' Trailer Feels Explosively Chaotic,

Just Like A 'Borderlands' Game

Gear up for a wild adventure voiced by Cate Blanchett, Kevin Hart, and Jack Black across Pandora. Photo courtesy of Lionsgate.

From controversial classical music figure to radiant outlaw, Oscar winner Cate Blanchett transforms herself into the badass leader of Pandora's psychos in the new "Borderlands" trailer.

In the role of siren Lillith, Blanchett has the firepower and weirdos necessary to head out on a quest for vaulted treasure. Her companions include fellow Oscar winner Jamie Lee Curtis, Kevin Hart, Ariana Greenblatt, Florian Munteanu, and Jack Black.

Together, they travel across a "dumpster fire of a world" called Pandora to find a secret vault that is filled with treasure. Unfortunately for fans of the game, the main antagonist seems to be Atlas—a weapon manufacturing corporation, and its CEO (played by Edgar Ramirez) instead of the game's notorious villain, Handsome Jack. Nevertheless, the trailer shows promise to be just as chaotic and fun as the game.

As bandit Roland, Hart joins the hunt for the hidden treasures. Other major characters from the game are featured in the trailer with fresh live-action looks at Tiny Tina, the young crazy demolition, Claptrap, a clumsy but sweet

robot, Krieg, a blood-thirsty psycho, and Dr. Tannis, a mad but insanely smart scientist.

In the trailer, there are some key characteristics that are changed for the screen—a prime example being the reworks of Tiny Tina's character. However, the game shows Tiny Tina as an interestingly unhinged maniac. Her calm and resourceful demeanor just won't cut it for fans of the beloved game. Dr. Tannis is less crazy as well, but again, the trailer only gives a little to the video-game-to-screen world of Pandora. Overall, the looks and the aesthetics really give off *Borderlands* vibes, along with its ecstatic energy—even the colors speak *Borderlands*. Some of the actions look incredibly fun and exciting, with random humor spread throughout. With a big-budget project, Roth surely looks like he will bring the bloody fun of the game to the screen.

The film is being helmed by Ali Roth, who is mostly known for his bloody horror movies, but so far, the visuals and the explosion elements really honor the source materials, including innovative weapons and deadly monsters that are popular in the game's DNA. There are numerous nods to the game's famous vehicle type and other weapon corporations—Hyperion and Maliwan—the trailer even shows snips of an Echo device, the game's most famous navigational tool. The tone is uplifting, mixing a bloody amount of gore and humor—hopefully there would be mention of “loot” in the film since that is the core identity of every “*Borderlands*” game.

“*Borderlands*” opens on August 9 in theaters. Watch the full trailer below.
